

July 13, 2020

Parents/Community:

Our District Phase plan was released in early June. That document described what type of education Monte Vista School District will offer during each phase and guide us if local, state or federal health officials make the decision to shut do to the COVID-19 pandemic or any other health concerns that arise.

The district developed a task force to work towards describing our plans for reopening this fall. This document address everything we need to do for our students to return to In-Person learning. It is an overall district approach to check-ins, mask procedures, transportation, extra-curricular events, cleaning of buildings, etc. **This document is a DRAFT.** This task force of Elementary/Secondary teachers, Administrators and classified staff worked extremely hard taking all factors, including the results from the parent survey, into consideration. We would like to present this to you, as well, so you will have input to the beginning of the 2020-21 school year. Specific details and plans regarding lunch, check-in procedures, passing periods, etc., are being developed at the building level.

Please read through the document thoroughly, then complete the survey. You can find the link to the survey in the email. There have been some difficult decisions, but the collaboration amongst our teachers and staff is second to none. Thank you all for your patience and feedback as we look forward to seeing all of our students in the fall!
